**Subject: DD/A Staff Meeting**

perhaps some scientific seminars would be developed on important scientific topics. It was his thought that such a procedure and program would be mutually beneficial to our research efforts. The group agreed that the idea was worth pursuing, whereupon Colonel Giller said he would ask [REDACTED], Technical Staff Assistant to the DD/A, to staff out a plan, collaborate with the ADs, etc.

4. Colonel Giller said that [REDACTED], as Acting AD/AG, would also be a member of the Career Service Board. Colonel Giller asked that the ADs have a personal look at applicants at the senior levels, such applicants cannot be evaluated very much below the AD level and furthermore require non-routine handling if there is to be any hope of appealing to senior level candidates.

5. Colonel Giller asked that [REDACTED] provide him with reports on the status of budget, space and personnel manpower matters.

6. [REDACTED] reported that the CIA ELINT Program for 1964 has progressed quite well and at this point is awaiting [REDACTED] concurrence. He also reported that [REDACTED] is becoming more reconciled to the proposed National ELINT Plan. He also reported that there had been detected recently [REDACTED]

[REDACTED] No further information concerning this is available at this time.

7. Colonel Giller requested that [REDACTED] make sure that [REDACTED], SCD, prepare a note for the DPMO on the lost [REDACTED] aircraft.

8. There was some discussion of the outcome of the GSA T/O increase and Colonel Lufford observed that he had no alternative but to move ahead in the acquisition of the necessary personnel even though it would undoubtedly exceed the approved increase. It was pointed out that the 47 ceiling positions that are being allocated to GSA at the expense of OMB are not to be in any way reflected in any T/O change of OMB, and that the T/O will remain as is and recruitment there will continue until the ceiling has been reached at which point we have the Executive Director's assurance that we will not be handicapped from developing the full strength of OMB as originally approved.

9. [REDACTED] raised the matter of [REDACTED] anticipated RND on Monday, 3 July, and reminded that OSA was to consider him, and that if OSA after discussion with him on a cleared basis felt that he was not needed, he is to be returned to the Office of the DD/R for another assignment.

10. There was some discussion of Mr. McMahon's transfer to the HRO set-up and also the matter of secretarial assistance. Colonel Ledford advised that he would make specific inquiry as to the particulars in these matters.

25X1A

11. [REDACTED] called attention to the fact that the new Agency program approval policy has been established and that it provides for specific arrangements between the Comptroller and each of the Deputy Directors. He also noted that as is standard procedure each office is authorized to commit one twelfth of the Congressional budget on a monthly basis until final approval is received.

12. Mr. Heber called attention to the problem of getting certain authoritative statements and briefings for the CONOM Committee which appropriately must come from the HRO but which in practice have not been forthcoming. Particularly needed is some way of forcing action or answers from the HRO on those matters where the official answer can only come from HRO; i.e., a current need is an authoritative briefing on IN capability and operational plans. He had recently learned that a given capability has existed for the past six months and nothing new is expected for another year; this in spite of the fact that a requirement from CONOM for such a capability has existed for a long time.
